

Installation Instructions

Insulated Copper Busbar

For Polarium Generation 5 products

Polarium insulated copper busbars are available and accurately sized for Polarium Generation 5 products.

Designed to meet the product power requirements, busbars save space and cost over power cables.

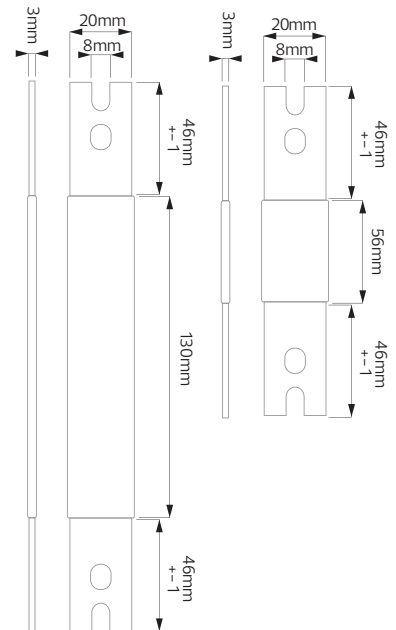

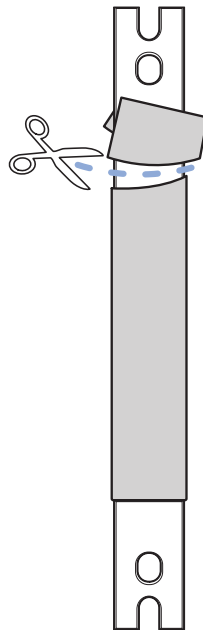

The busbars are constructed to allow for the maximum current flow.

Technical data

Product Number	Material	Description
117-00006	Copper	Insulated busbar for 2U
117-00008	Copper	Insulated busbar for 4U

Cut insulation

Insulation material is designed to be cut if needed to allow for a proper fit between layered busbars.
